

One Company AND THE North American Hazardous Waste Trade

The movement and disposal of hazardous waste in North America is a profit-driven industry, an international trade, like clothing or fruit. The United States is a **NET IMPORTER** of hazardous waste.

As with any industry, the North American hazardous waste trade has its prominent names. **CLEAN HARBORS** is one such key player. In 2012 alone, Clean Harbors imported 1,861,819 lbs. of hazardous waste.

- Clean Harbors Receiving Facility
- General Flow of Imported Waste

WASTE SAMPLE
