| Monterey                  |                    |

## Evergreens vs. Conifers:

The category referred to as Evergreen, includes all plants which are always green, meaning they retain their leaves even during the winter season. The Latin word Conifer means cone-bearing. Coniferous trees are, therefore, trees that bear cones. Almost all coniferous trees are also evergreens. Pine trees are one type of coniferous trees.
