Land Owners Mission: The owner's goal for this property is to return its habitat to an Oak Savannah. This entails the removal of all invasive species found on the property, planting and caring for saplings of multiple native species, and making sure the deer population doesn't inflate, causing overgrazing. This is where my family comes in, as we trade labor for the privilege to hunt this property. Being able to work and hunt on this land has ingrained in me a love for the driftless area, but more specifically it has given me a new appreciation for proper habitat management. I hope to be allowed access to this property for years to come as it has become my favorite place to escape the hustle and bustle of life downtown. I made this map with the owner in mind, hoping he will appreciate it as much as I appreciate him.
