What is BRT anyway?

BRT or bus rapid transit is essentially high-quality bus service. It features dedicated running way in the form of bus lanes and signal priority at traffic lights. Additionally, there are significantly fewer stops and higher frequency service (approx. every 15 mins). Each station will have level boarding with real-time transit information.

A Note on Transfers

There are many more transfer options than are depicted on this map, this map is designed to showcase the BRT routes. Please consult the Madison Metro Network Map for a complete service map.

Legend

- Line A (Expected to be Completed in 2024)
- Line B (Expected to be Completed in 2027)
- BRT Station (1 line)
- ⊖ BRT Station (multiple lines)
- ⌘ Transfer to a Local Bus Line
