

Geog 378: Introduction to Geocomputing

Credits: 4

This class meets for a total of 4 class period hours [two 75-minute classes and one 2-hours lab session] each week over the fall semester and carries the expectation that students will work on course learning activities for about 3 hours out of classroom for every class period. The syllabus includes additional information about meeting times and expectations for student work.

Lectures (360 Science Hall): Tuesday & Thursday 9:30 AM-10:45 AM

Instructor: Prof. Song Gao

Office Hours: Tuesday 1:00-2:00 PM, Thursday 1:00-2:00 PM, or by appointment (421 Science Hall)

Email: song.gao@wisc.edu

Labs (380 Science Hall):

Section 301: Wed 8:50 AM - 10:50 AM

Section 302: Wed 11:00 AM - 1:00 PM

Teaching Assistant: Chenxiao Guo

TA Office Hours: TBD or by appointment (M376 Science Hall, the Student Lab Room)

Email: chenxiao.guo@wisc.edu

Overview

Geography 378 (GEOG378) will introduce students to the scripting and programming tools and skills commonly employed in GIS and spatial analysis using Python. The skills learned in this course are equally applicable in scientific research, the public sector, and private industry. This course helps satisfy the programming requirements of the Cartography/GIS undergraduate/graduate major and provides foundational knowledge for the Online Professional Master's in GIS & Web Map Programming as well as for the GIS certificate program students. No programming background is assumed for this course.

Course Learning Outcomes

Upon completion of the course modules, the student is expected to:

- Be able to write shell commands to accomplish common (batch)geoprocessing tasks using popular open-source utility programs, and they will learn when these utilities are preferred over mainstream GIS software.
- Have basic skills in the Python programming language, and they will have acquired programming concepts necessary for advanced GIS courses that require programming.
- Know how to use Python with open-source GIS libraries regardless of the Integrated Development Environment (IDE). The students will also learn how Python can extend the capabilities of ArcGIS to solve problems difficult or impossible to address otherwise.

- Be familiar with major geospatial vector and raster file formats and specifications for spatial reference coordinate systems.
- Have used and be comfortable with online resources that support geocomputing and programming in the GIS profession.
- Learn newly developed GIS computation tools/libraries and platforms.

Course Materials

Textbook: *Think Python: How to Think Like a Computer Scientist* by Allen Downey et al., 2014, O'Reilly.

Recommended Readings:

- *Python Scripting for ArcGIS*, by P.A. Zandbergen. ESRI Press, 2014, 358 pp.
- *Introduction to GIS Programming and Fundamentals with Python and ArcGIS* By Chaowei Yang et al., 2017, CRC Press.

All lecture slides and notes are available on the *Canvas*. Notice that our communication will be almost exclusively through the messaging platform on *Canvas*. It is advised that you set up your email alerts in *Canvas* to send you daily updates about assignments, communication from your instructors, TAs, and changes to the course. See instructions at:

Grading

70% Lab Assignments + 30% Quizzes

Course grades will be based on one or two in-class quizzes (30% of total grade) and 7 laboratory assignments (70% of total grade). Quizzes will be given in the class and will cover the material presented in the course lectures and notes with an emphasis on concepts and vocabulary. Lab assignments will require original programming based on lecture material. Lab assignments are not scheduled weekly, but there will be weekly lab time scheduled (consult your lab section for times) and you can use this time to work on your assignments or work through course material. There is no final exam or other summary activity for this course.

Grading Scale:

Score	Grade	Grade Points Per Credit
> or = 90	A (Excellent)	4
86 ~ 89.99	AB (Intermediate grade)	3.5
80 ~ 85.99	B (Good)	3

76 ~ 79.99	BC (Intermediate grade)	2.5
70 ~ 75.99	C (Fair)	2
60 ~ 69.99	D (Poor)	1
< 60	F (Failure)	0

Course Outline (2018 Fall)

The following is a tentative schedule. Please check the Canvas website for updates.

Modules	Lectures & Date	Labs
Module 1: Introduction and Python Fundamentals	Lesson 1: Understanding geospatial data formats and file organization (9/6)	
	Lesson 2: Programming basics & Python core concepts (9/11, 9/13)	Lab 1: Introduction to Python (9/12)
	Lesson 3: Functions (9/18, 9/20)	
	Lesson 4: Flow control (9/25, 9/27)	Lab 2: Functions and containers (9/26)
Module 2: Python Advanced Concepts	Lesson 5: Containers (10/2, 10/4)	
	Lesson 6: Copies, Reading and Writing files & Python system access (10/9, 10/11)	Lab 3: File I/O and system access (10/10)
	Lesson 7: Classes and objects (10/16, 10/18)	
	Lesson 8: Plotting with Python (10/23, 10/25)	Lab 4: Python classes and plotting (10/24)
Module 3: Python for GIS	Lesson 9: Raster Processing with GDAL (10/30, 11/1)	Lab 5: GDAL and Python (11/7)
	Lesson 10: Vector Processing with OGR (11/13, 11/15)	Lab 6: OGR and Python (11/14)
	Lesson 11: Geoprocessing with ArcPy (11/20, 11/27, 11/29)	Lab 7: Arcpy (11/21)
	Lesson 12*: Interactive Mapping and Geoprocessing on Jupyter Notebook (12/4, 12/6)	Lab 8*: Jupyter Notebook (12/5)
In-Class Quizzes	Quiz 1 (11/6)	

- Optional if time permits

Attendance (Required)

You must attend all lectures & lab sessions and complete all course assignments and quizzes on time. You should appropriately comment all code you submit for a grade. Please seek assistance when you have a question or problem through office hours and/or your peers.

Communication & Accommodation

The University of Wisconsin-Madison supports the right of all enrolled students to a full and equal educational opportunity. The Americans with Disabilities Act (ADA), Wisconsin State Statute (36.12), and UW-Madison policy (Faculty Document 1071) require that students with disabilities be reasonably accommodated in instruction and campus life. Reasonable accommodations for students with disabilities is a shared faculty and student responsibility. Students are expected to inform faculty of their need for instructional accommodations by the end of the third week of the semester, or as soon as possible after a disability has been incurred or recognized. Faculty will work either directly with the student or in coordination with the McBurney Center to identify and provide reasonable instructional accommodations. Disability information, including instructional accommodations as part of a student's educational record, is confidential and protected under FERPA. If you face any personal or professional difficulties or require accommodation or a disability, please feel free to contact me as soon as possible.

Academic Integrity

Academic Integrity is critical to the mission of the University of Wisconsin-Madison, a research institution with high academic standards and rigor. All members of the University community play a role in fostering an environment in which student learning is achieved in a fair, just, and honest way. Plagiarism is prohibited in lab assignments and quizzes. Any offense results in a zero for the grade and disclosure of the impropriety to the Department and University.
