

What you can do with your **CARTOGRAPHY & GIS MAJOR**

Major Skills:

Geospatial Analysis & Cartographic Design

You leverage cartographic design principles and geographic information systems (GIS) to visualize, manage, and analyze geospatial data for a variety of purposes and audiences.

Research in Cartography and GIS

You combine geospatial theories, methodologies, and project management strategies to design, carry out, and report on place-based research in collaborative ways. You take care to identify and respond to ethical issues in research practice and geodata.

Qualitative and Quantitative Data Analysis

You code and analyze qualitative and quantitative data, utilizing appropriate theories, methods, and software, interpreting the results of data gathering, and effectively presenting and visualizing geodata.

Enabling Spatial Decision Making

You utilize GIS-based spatial decision tools to manage geospatial data and assess complex processes for addressing environmental, economic, health, and other social issues that confront policy-makers and citizens.

Spatial Reasoning & Critical Thinking

You employ spatial reasoning strategies to detect patterns and identify processes that make sense of the dynamic interplay between human and natural characteristics of place and space.

Communication

You distill complex geospatial data and concepts into insights using written, oral, and visual forms of communication appropriate for technical, non-technical, and community-based audiences.

Supplement Your Skills With:

Global & Intercultural Experience

Leadership and Mentoring through Student Organizations and Community Groups

Research and Internship Experience

Career and Self-Development

Ethical Conduct in Data Analysis & Privacy

Building a Portfolio consisting of Visualizations and/or Programming Languages

Put your Cartography & GIS major to **WORK**

Frequent Alumni Job Titles:

1. Geographic Information Systems Analyst
2. Geographic Information Systems Coordinator
3. Project Manager
4. Cartographer
5. Business Owner
6. Planner
7. Data Analyst
8. Director of Engineering
9. Geospatial Specialist
10. Systems Engineer

Top Employers of Alumni:

1. Aerial Mapping Solutions
2. Air Center Helicopters (ACH)
3. Alliant Energy
4. Ameriprise Financial Services LLC
5. Apple
6. Argonne National Laboratory
7. CBRE
8. Continental Mapping Consultants
9. ESRI
10. Facebook
11. Leidos
12. Madison Gas & Electric
13. Mead & Hunt
14. National Geographic
15. Quantum Spatial
16. State of Wisconsin
17. The New York Times
18. The Walt Disney Company
19. Wisconsin Department of Natural Resources (DNR)
20. US Department of Veterans Affairs

Post-Graduation Plans 2016-2021:

- 90%** Employment
- 10%** Continuing Education or Grad School

Industry of Employment 2016-2021:

1. Government
2. Information Technology
3. Manufacturing
4. Non-Profit
5. Telecommunications

Where Alumni Live & Work:

- 33%** Wisconsin
- 8%** California
- 6%** Minnesota
- 6%** Colorado
- 47%** Other

"My Cartography and GIS degree taught me how to approach problems from both analytical and empathetic angles, thinking not only about the how, but the why. These skills have been crucial for solving ambiguous customer issues at Mapbox or when working with big data to tell visual stories at Reuters."

Clare Trainor, 2016
Data Visualization Developer, Reuters
San Francisco, CA

"I use the Cartography/GIS skills that I learned at UW-Madison in a wide range of settings. The analysis skills that I learned help me solve planning challenges related to diverse topics such as preferred locations for solar/wind installations in the county or future land use planning. My cartography skills help me format, arrange, and present plans that we develop so they are easily comprehended by our audiences."

Kevin Englebert, 2015, 2022
Development and Land Services Director -
Outagamie County
Appleton, WI

Career Communities for Cartography & GIS Majors

SuccessWorks has eight Career Communities to connect you with career advising, resources and programs. Here are a few suggestions on where Cartography & GIS majors can start.

Not inspired by these options? Visit SuccessWorks to explore more widely.

- **Technology, Data & Analytics**
- **Environment, Natural Resources & Wildlife**
- **Government, Policy, International Affairs & Law**
- **Consulting, Finance, Management & Client Relations**
